Mironshoh Asadov

Software Engineer (NodeJs | ReactJs | VueJs | Python)
Tashkent, Tashkent, Uzbekistan

Summary

Software Engineer with 3 years+ experience.

Passionate and seasoned Backend Engineer with a strong focus on Node.js development, currently part-time studying a Bachelor of Engineering degree in Software Engineering at Tashkent University of Information Technologies. I have actively participated in projects, primarily involved in architecting project structures, refining them, and contributing to the testing process of written code until its completion.Software Engineer with 3 years+ experience. Passionate and seasoned Backend Engineer with a strong focus on Node.js development, currently part-time studying a Bachelor of Engineering degree in Computer Engineering at Tashkent University of Information Technologies. I have actively participated in projects, primarily involved in architecting project structures, refining them, and contributing to the testing process of written code until its completion.

Experience

Najot Ta'lim
Nodejs Mentor
May 2024 - Present (6 months)
Tashkent, Uzbekistan

At this time I am in mentor positon at Najot Ta'lim . I teach a lot of students every day .

MagicSoft Pro
Software Engineer
May 2023 - Present (1 year 6 months)
Toshkent, Uzbekistan

During the activity of this company, I participated in several projects. They are as follows:

iqroquran.com - this project has very convenient opportunities for reading, teaching and memorizing the Qur'an. The project was developed as a mobile,

web and telegram bot. I built the telegram bot completely myself along with the backend part of the project.

tniasia.net - the project is a convenient internet maze and crm system for large and small importers.

tjsmed.uz - project is an internal system for solving problems in medical polyclinics. This system is currently working in several clinics.

FaceId(magicsoft) is a project for private enterprises to track workers through facial expressions and fingerprints. During this project, we integrated our project with the international hicvision project.

EximERP
Back End Developer
November 2021 - May 2023 (1 year 7 months)
Tashkent, Tashkent, Uzbekistan

I worked on the EximERP project for more than 6 months. In this regard, documents are prepared by ordering online on the basis of private partnership in the field of customs. During the project, we worked on the integration of the system with e-imzo, didox.uz, solik.uz. In this project, I helped with the frontend along with working on the backend.

Education

Tashkent University of Information Technologies TUIT
Bachelor's degree, Computer Software Engineering · (September 2020 - July 2024)
